

Our innovative tech tools fix problems before they happen.

“We don’t count all the rooms we sell.”

You need better audits. Our exclusive **AuditPro**® service locates attendees who stay at official hotels, but don’t book through your program. You’ll get accurate counts and avoid attrition penalties.

“Tracking VIP rooms is very messy.”

Do it all in one password-protected site. **Orchestrator**™ links bookings for VIPs, special guests and staff so you can easily review, manage and make reservations.

“My sub-groups are demanding.”

Invite them to manage their blocks with **Groups Wizard**™. On one secure site, they can handle every detail...instead of calling you. You can also give groups early access to online booking with **ResOpen**®.

“Our waitlist is a black hole.”

Travel Planners automates waitlisting. Our **eChoice**™ service re-sells cancelled rooms ASAP. More of your guests get their first-choice hotels. You practically eliminate the risk of prime rooms sitting empty.

“Over-sells and walks drive us crazy.”

Never again! **ResAssure**® guarantees a hotel confirmation number for every guest, so you avoid check-in nightmares.

“We see too many reservation errors.”

Our **DirectConnect**® tool exchanges reservation data electronically with most hotels. We cut out data re-entry and middlemen to keep mistakes from creeping in.

“Our email misses the target.”

Let our **eFocus Marketing**® team implement a complete strategy. Our **ListIQ**® tool matches reservation and registration lists to find high-value segments. Then, targeted emails generate maximum pick-up.

“Our housing and registration sites don’t connect.”

DataSync® transfers registrant data to the housing site so you lock in both transactions in one session. This open-code tool links seamlessly with major registration providers or your internal department.

“I never have the report I need.”

At **MyHousingInfo.com**®, you can customize reports based on more than 30 criteria. If you prefer, we’ll create and upload reports to your specs so you always have the data you need.
