

The Best Housing Technology First

As a Travel Planners client, you'll always be ahead of the technology curve. Built on more than three decades of R&D investment, our breakthrough housing tools boost productivity, deliver the best user experience, and generate real bottom-line benefits.

AuditPro®

Sophisticated proprietary name-match protocols cast the widest net to detect book-arounds. You get credit for every room night and proof of your event's true economic value for leverage in negotiations.

Comp Tracker™

Track and assign earned comp nights online in real time with the industry's most full-featured tool. It's the easiest way ever to make sure you never waste precious comp nights.

Confirmation Concierge™

Customized HTML confirmations add value by providing links to venue, event and travel information. You can sell or trade space to exhibitors or sponsors to generate revenue.

DataSync®

Our one-click tool helps attendees reserve and register in one session so you capture both transactions. Secure data sharing is a key feature of our integration with best-in-class registration providers.

eChoice™

Our automated tool lets guests waitlist themselves if they can't get into their preferred hotels. We notify them rapidly if a room becomes available. More attendees get their first choice; your prime rooms stay full.

Event Headliner®

We customize your booking site to display targeted messages for attendee and exhibitor segments. This high-visibility area can feature special hotel offers, show announcements and paid exhibitor promos.

Espresso

Our go-anywhere housing portal fits on your event site, Facebook page and other partner sites to boost visibility and pick-up. It's the only gateway that displays real-time night-by-night availability for all hotels.

Groups Wizard™

The industry's best user experience for exhibitors! This powerful tool simplifies booking and block management with the exclusive ability to make multiple updates at once, instead of one room at a time.

Impact Protection Plan®

If post cut-off rooms can't be obtained, our affiliated company, Quikbook.com, can accept reservations at non-program hotels. We track bookings to your event so you get full credit.

Mobile Reservation Site

The industry's first site optimized for smartphone booking! Our sleek, event-branded interface is full-featured, so your tech-forward guests can do everything to make and manage reservations on their mobile devices.

MyHotelReports.com®

Our PCI-compliant portal provides hotels with real-time access to reservation info and roomlists. This unmatched communication improves accuracy and supports strong hotel relationships.

MyHousingInfo.com®

This robust site powers decision-making by giving you 24/7 access to real-time housing reports. See topline stats, view automatic reports, use intuitive tools to customize your own, or ask us to create reports to your specs.

Orchestrator™

We link bookings for VIPs, staff and special guests in this single password-protected site. You have complete control to review, manage and even make reservations for any of them.

RatePatrol

Our automated tool shops discount and hotel-direct sites 24/7 for lower rates. When we find them, our team approaches hotels to stop the under-selling and restore your low-rate advantage.

ResAssure®

We guarantee every attendee and exhibitor a real hotel confirmation number before opening day. It's an exclusive Travel Planners service that prevents check-in problems and walks.

ResOpen®

Our unique system lets you stage the early opening of room blocks for exhibitors or other special groups. It's one more way our program will adapt to your event's policies.

Unified Confirmation™

We automatically confirm both registration and housing reservation in a single email. It's a top-rated benefit of our seamless integration with leading registration companies.

Zip Book

Groups that need from 2-9 rooms can reserve them all in one real-time session. By making it so easy for smaller exhibitors and sub-groups to book in the block, you lock in the pick-up from this valuable segment.

ZoomList™

Our exhibitor roomlist tool is the only one that handles initial uploads and unlimited updates. ZoomList saves time and integrates all reservation info for instant online access without data re-entry errors.

For more information, call 800.221.3531, ext. 2345 or email sales@TPhousing.com

Our tools work together to solve your most important housing issues.
